

WRITING AN EFFECTIVE CURRICULUM VITAE

A Curriculum Vitae (CV) is the appropriate way of presenting yourself for employment in academic and research based settings. It can also be used when applying for fellowships and grants. The CV has an academic focus and is a very important tool for graduate students. It consists of a summary of your background in the areas of teaching, research, and service. This would include courses taught, research conducted, publications, awards, and service work. A CV can be much longer than a standard resume and would not be appropriate for most other job types in the public or private sector.

A CV may include, but is not limited to:

- Name and contact information, including mailing address, phone number, and e-mail address
- Professional qualifications
- Major/ Area of Study for all degrees showing dates and institutions
- Work experience
- Teaching experience (including associate instructor or GA positions)
- Research interests, dissertation, thesis
- Publications, presentations, articles, abstracts, books
- Grants applied for, grants obtained
- Leadership experience/ service work
- Professional affiliations/memberships
- Specific skills and certifications

The headings and categories of information that you choose to include on your CV may vary. Looking at a sample CV or the CV of your professor/faculty advisor may be useful in determining the headings and categories that best illustrate your qualifications for a particular position.

Always print the CV in a standard typeface that is easy to read, such as Times New Roman, Arial, Calibri, Garamond, or Georgia. Avoid fonts that are difficult to read or that do not offer a mature, conservative feel. The typical point size is 11 points. You should never use smaller than a 10 point font and generally no greater than a 12 point font. Use only white or ivory “resume” paper when printing copies of the CV. Resume paper is of high quality with a heavier weight; it can be purchased at any office supply store. Always print the CV single-sided and include a running header or footer on each page, indicating your name and the appropriate page number.

Consistency is essential in formatting. Utilize a consistent font throughout and the same header style for each section of the CV. Be sure to align bullets, dates, and locations along the same tab stops throughout the document. Sudden changes in format or alignment from one section to the next will make things more difficult for the reader and may be seen as a lack of attention to detail.

There are numerous ways to format a CV. One example is provided here, but there are many potential formats that may work, depending on your specific discipline. Take the opportunity to review many sample CVs. Ask the advice of career staff, faculty, and friends when formatting your CV. Have the document reviewed by several people before sending it out.

Summary of Qualifications

(This section is optional. A summary of qualifications lets you describe your key skills and qualifications for the position).

Review the job description carefully and craft a profile or summary that demonstrates you are an excellent match for the position. Emphasize the qualities and skills you possess that align with the job requirements.

Education

(List your education in reverse chronological order with the most recent first).

Graduate University School Name, City, ST

Name of Degree (e.g. Ph.D. in Field of Study)

May 2015

Major: List Here, Minor: List Here

Dissertation title or topic, Name of your advisor, Name of Department

List any academic honors you received

Graduate University School Name, City, ST

Name of Degree (e.g. MS in Field of Study)

Aug. 2014

Major: List Here

Thesis title or topic, Name of your advisor, Name of Department

List any academic honors you received

Undergraduate University School Name, City, ST

Name of Degree (e.g. BS in Field of Study)

May 2013

Major: List Here, Minor: List Here

List any academic honors you received

Professional Experience

*(Includes academic appointments such as teaching & research assistantships, along with work experience listed in reverse chronological order. Depending on the amount of experience and relevance to field, you may also divide your experience into more than one section of the CV with titles such as **Teaching Experience**, **Research Experience**, **Relevant Work Experience**, etc.).*

Name of Organization, City, ST

Sept. 2015-Present

Your Job Title (Such as Associate Instructor)

- For teaching positions, describe the skills you utilized while teaching, such as course planning, classroom organization, communication and presentation skills, and laboratory teaching skills.
- Describe knowledge you have gained regarding different teaching and learning styles.
- Mention your familiarity with specific online teaching platforms, test design, and grading systems.

Name of Organization, City, ST

Aug. 2013-Aug. 2014

Your Job Title (Such as Teaching Assistant)

- Provide brief and effective descriptions illustrating your role(s) and note beneficial outcomes. Begin each description with an action verb and use the appropriate verb tense for present or past positions.
- Include metrics to quantify your contributions and provide appropriate scope of your involvement.
- Review the job description and focus your statements to show how you meet the needs of the organization.

Name of Organization, City, ST

June 2012-July 2013

Your Job Title (Such as Health and Wellness Manager)

- Consider your transferable skills and include that information in your descriptions. Think about how you demonstrated leadership, project management, and team-building skills.
- Mention specific computer programs you utilized as a function of your work.

Research Experience

(Includes research positions, projects, and interests. List research experiences in reverse chronological order. This section should come directly after Education if you are applying for a research-based position).

Name of Organization/Department, City, ST Sept. 2015-Present

Your Job Title (Such as Statistical Consultant)

- Describe your role in the position.
- Mention statistical analysis programs and techniques used.
- Mention specific computer programs you utilized as a function of your work, such as database applications.
