

Careers in **PUBLIC HEALTH & SAFETY**

Students completing degrees in the areas of public health and safety are looking to make a difference in their community and workplace. Whether it's the student focusing on protecting the environment, the one leading a community health program, or the one striving to create safe workplaces for all levels of employees, these students graduate with the skills needed to be successful. Our students complete courses in environmental health, epidemiology, social and behavioral health, health administration, and biostatistics, just to name a few.
